

Application No.: To Be Assigned
Dated: May 17, 2006
Amendment

REMARKS/ARGUMENTS

Claims 14 through 33 have been added in order to present applicant's claims in better form for U.S. National Phase examination, support for which may be found in applicant's claims 1 through 13, as originally filed, applicant's Figs. 1 through 6 and elsewhere within applicant's specification. Claims 1 through 13 have been cancelled without prejudice or disclaimer of subject matter. An English language translation is enclosed. Additionally, a substitute specification is enclosed in redline and non-redline formats, in order to provide a specification in better form for U.S. National Phase examination.

As may be seen from a careful review of the English language translation of applicant's PCT application, the substitute specification and the newly added claims are fully supported by the original application.

The Examiner's attention is directed to the substitute specification, wherein applicant's original claims 1 through 13 have been incorporated into the new Summary of the Invention section and placed in sentence format to assure that support for newly added claims 14 through 33 clearly exists. Additionally, a new Abstract is presented in the substitute specification in order to more closely comply with U.S. practice. The original Abstract has been inserted at paragraphs [0028] through [0030] of the Detailed Description of the Invention, once again, to assure that support for newly added claims 14 through 33 exists. Finally, the Brief Description of the Drawings section has been moved from the end of the specification to just above the Detailed Description of the Invention section, in accordance with U.S. practice.

Application No.: To Be Assigned
Dated: May 17, 2006
Amendment

It is respectfully submitted that the present claims are in condition for allowance. Prompt notification of allowance is respectfully solicited.

Respectfully submitted,

Date: May 17, 2006
